PROFESSIONAL SUMMARY

AI/ML Engineer and Python Developer with an 8.99 CGPA, applying Machine Learning, Deep Learning, and Computer Vision across 13+ AI projects in healthcare, agriculture, and cybersecurity. Recognized at MumbaiHacks 2025 for healthcare innovation. Completed two internships building and deploying ML-driven and full-stack applications, gaining hands-on experience shipping models to production.

TECHNICAL SKILLS

Languages: Python, Java, C++, C

Machine Learning & Deep Learning: TensorFlow, Scikit-learn, OpenCV, CNN, RNN, LSTM, YOLOv8, NLP, Transfer Learning

AI Concepts: Feature Engineering, EDA, Prompt Engineering, Agentic AI, LLMs

Web Development: HTML, CSS, JavaScript, React, Node.js, Express.js, REST APIs

Databases: MySQL, MongoDB, SQLite

Tools & Practices: Git, Docker, MLflow, Power BI, CI/CD, MLOps, Agile

Cloud & Hosting: Streamlit, Flask, Render, Railway, Netlify, Vercel, Hugging Face

EDUCATION

B.Tech, Computer Science Engineering (AI & ML)

Expected June 2027

D.Y. Patil Agriculture and Technical University, Talasande | CGPA: 8.99 / 10

Diploma, Computer Science Engineering

2021 – 2024

Sharad Institute of Technology, Ichalkaranji | 82%

INTERNSHIP EXPERIENCE

Machine Learning Intern — PJSofttech Pvt. Ltd.

Jan 2025 – Jan 2026

- Trained and validated supervised and deep learning models using TensorFlow and Scikit-learn, improving prediction accuracy on structured datasets.
- Prepared text data for classification tasks by configuring NLP preprocessing workflows with tokenization and TF-IDF vectorization.
- Documented experiment results and packaged prototypes for stakeholder demos, helping cross-functional engineers iterate faster on model improvements.

Web Development Intern — Wolfox, Kolhapur

Mar 2023 – Jun 2023

- Created responsive frontend interfaces in HTML, CSS, JavaScript, and React, connected to backend REST APIs for live data.
- Tested and resolved functional issues alongside senior developers, ensuring reliable performance across web modules.
- Coordinated within an agile team to deliver client-facing modules on schedule, supporting sprint goals and code reviews.

PROJECTS

ClinSense AI — Smart Healthcare Monitoring System

Tech Stack: Python, TensorFlow, Scikit-learn, Streamlit

- Designed an AI-driven healthcare monitoring app using TensorFlow and Scikit-learn to support early disease detection through supervised ML models.
- Refined the feature engineering and preprocessing workflow, raising model prediction accuracy to 95%.
- Launched a production-ready Streamlit app that earned recognition from the HCLTech panel at MumbaiHacks 2025.

Arogyamitra — Agentic AI Healthcare Assistant

Tech Stack: Python, Agentic AI, LLM, Prompt Engineering, Vercel

- Architected an autonomous AI assistant for symptom analysis and personalized medical guidance using LLM-based reasoning.
- Applied prompt engineering to orchestrate conversational flows that deliver context-aware health recommendations.
- Enabled multi-turn conversation handling and hosted the assistant on Vercel for fast query resolution.

Smart Driver Drowsiness Detection System

Tech Stack: Python, CNN, TensorFlow, OpenCV, Node.js, MySQL

- Developed a CNN-based computer vision model with TensorFlow and OpenCV to detect driver drowsiness from live video feeds.
- Combined GPS tracking with automated emergency alerts to speed up incident response.
- Tuned model inference for faster detection and logged events in MySQL for incident review.

AI Smart City Surveillance System

Tech Stack: Python, YOLOv8, OpenCV, EasyOCR, Flask, SQLite

- Engineered a vehicle, helmet-violation, and fire detection solution using YOLOv8 and OpenCV on live CCTV feeds.
- Automated number plate recognition with EasyOCR to streamline identification for enforcement use cases.
- Set up a Flask and SQLite backend to process concurrent video streams with alert logging.

DualCrop Smart Advisory + KissanGPT

Tech Stack: Python, Machine Learning, Node.js, Railway, Netlify

- Built a precision farming platform delivering crop recommendations and yield optimization insights.
- Integrated KissanGPT, a conversational chatbot, to help rural farmers resolve agricultural queries instantly.
- Trained disease-prediction models on crop image datasets to support early intervention recommendations.

Diabetic Retinopathy Detection

Tech Stack: Python, TensorFlow, CNN, OpenCV

- Implemented a CNN model using TensorFlow to classify retinal fundus images for diabetic retinopathy diagnosis.
- Applied transfer learning to fine-tune the model architecture, achieving strong classification accuracy on held-out test data.
- Validated performance with confusion-matrix metrics to confirm diagnostic reliability.

CERTIFICATIONS

- Advanced Data Science, Machine Learning, Deep Learning & NLP Bootcamp — Udemy
- Advanced Full Stack Web Development Certification
- Core Java & Advanced Java Certification — Grade A+

ACHIEVEMENTS

- MumbaiHacks 2025 — Built ClinSense AI and received formal recognition from the HCLTech panel for healthcare innovation.
- Academic Excellence — Scored full marks in the MSBTE Final Examination (PHP) and was honored by the college for performance.
- Open Source Contributor — Active GitHub contributor maintaining multiple deployed AI/ML projects.

SOFT SKILLS

Problem Solving | Analytical Thinking | Communication | Teamwork | Adaptability
