PROFESSIONAL SUMMARY

AI/ML Engineer and Python Developer with strong foundations in Artificial Intelligence, Machine Learning, Deep Learning, Computer Vision, and Data Analytics, backed by a CGPA of 8.9. Delivered 13+ AI/ML and full stack development projects using TensorFlow, Scikit-learn, OpenCV, YOLOv8, and Node.js, complemented by 2 internships in machine learning and web development. Recognized at MumbaiHacks 2025 by HCLTech for an AI-driven healthcare innovation. Skilled in building end-to-end intelligent systems, REST APIs, and data-driven applications from concept to deployment.

TECHNICAL SKILLS

Programming: Python, Java, C++

Artificial Intelligence & Machine Learning: TensorFlow, Scikit-learn, ANN, CNN, RNN, LSTM

Deep Learning & Computer Vision: OpenCV, YOLOv8, CNN-based Image Classification

Data Science & Data Analytics: Data Preprocessing, Model Evaluation, Power BI, NLP

Frontend: React.js, HTML, CSS, JavaScript

Backend: Node.js, Express.js, REST APIs, Flask

Databases: MySQL, MongoDB, SQLite

Developer Tools: Git, GitHub, Jupyter Notebook, VS Code, MLflow

Deployment: Docker, Streamlit, Render, Railway, Vercel, Hugging Face

EDUCATION

B.Tech – Computer Science Engineering (AI & ML), D.Y. Patil Agriculture and Technical University, Talasande

CGPA: 8.9/10 | Expected: June 2027

Diploma – Computer Science Engineering, Sharad Institute of Technology, Ichalkaranji

82% | 2021 – 2024

INTERNSHIP EXPERIENCE

PJSoftech Pvt. Ltd. — Machine Learning Intern | Jan 2025 – Jan 2026

- Developed and trained Machine Learning and Deep Learning models in Python to support applied AI use cases, improving model reliability through iterative evaluation.
- Built NLP pipelines involving text preprocessing, feature extraction, and model performance evaluation for real-world data problems.

Wolfox, Kolhapur — Web Development Intern | Mar 2023 – Jun 2023

- Engineered responsive frontend interfaces using HTML, CSS, and JavaScript, enhancing usability across web applications.
- Collaborated on backend development and API integration, strengthening full stack development and problem-solving skills.

PROJECTS

Arogyamitra – Agentic AI Healthcare Assistant | Python, React.js, FastAPI, Agentic AI, Vercel, Render

- Architected an autonomous Agentic AI healthcare assistant enabling intelligent symptom analysis, decision-making, and patient support.
- Applied Agentic AI and Python to automate healthcare workflows, improving response accuracy and deployment via Vercel.

ClinSense AI – Smart Healthcare Monitoring System | Python, TensorFlow, Scikit-learn, Streamlit

- Engineered an end-to-end AI healthcare platform using supervised Machine Learning models for early disease detection.
- Recognized at MumbaiHacks 2025 by HCLTech; deployed via Streamlit for real-time data analytics and monitoring.

AI Smart City Surveillance System | Python, YOLOv8, OpenCV, Express.js, Node.js, SQL

- Deployed a YOLOv8 and OpenCV-based Computer Vision system for real-time vehicle, helmet-violation, and fire detection via CCTV.
- Built REST API endpoints with Flask and SQLite for data storage, enabling scalable AI-driven surveillance analytics.

Smart Driver Drowsiness Detection System | Python, CNN, TensorFlow, OpenCV, Node.js, MySQL

- Delivered a real-time Deep Learning drowsiness detection system using CNN-based Computer Vision with emergency GPS alerts.
- Integrated Node.js and MySQL for backend data logging, enabling a robust full stack AI safety solution.

DualCrop Smart Advisory System + KissanGPT | Python, Machine Learning, Node.js, Railway, Netlify

- Designed an AI-powered precision farming platform using Machine Learning for crop recommendation and yield analysis.
- Integrated a GPT-based chatbot (KissanGPT) for natural language query resolution, deployed via Railway and Netlify.

Diabetic Retinopathy Detection using CNN | Python, TensorFlow, CNN, OpenCV

- Trained a CNN-based Deep Learning pipeline using TensorFlow to classify retinal fundus images for diabetic retinopathy diagnosis.
- Applied OpenCV for image preprocessing, improving model accuracy and reliability in medical Computer Vision diagnostics.

Loan Manager App (Live Project) | HTML, CSS, JavaScript, Node.js, Express.js, MySQL

- Developed a full stack Loan Management System with EMI calculation, interest tracking, and an integrated Expense Tracker.
- Implemented secure authentication, REST APIs, and CRUD operations with MySQL for scalable data management.

AquaTrack – Smart Water Supply Management System (Live Project) | Node.js, Express.js, MySQL, HTML, CSS, JavaScript

- Developed a responsive full stack web application for consumer management, billing, and complaint tracking.
- Built secure authentication, an interactive dashboard, and complete CRUD functionality using MySQL and REST APIs.

CERTIFICATIONS & ACHIEVEMENTS

- MumbaiHacks 2025 – Recognized by HCLTech for ClinSense AI
- Advanced Data Science, Machine Learning & NLP Bootcamp
- Advanced Full Stack Web Development
- Core Java & Advanced Java (Grade A+)
- Active GitHub Contributor with multiple AI/ML repositories
